Data – 2017 PIT and HIC
Data – 2017 PIT Veterans and Youth
Data – 2017 System Performance Measures

FY2016 - Performance Measurement Module (Sys PM)
Summary Report for OR-505 - Oregon Balance of State CoC

For each measure enter results in each table from the System Performance Measures report generated out of your CoC’s HMS System. There are seven performance measures. Each measure may have one or more “tiers” used to measure the system performance. Click through each tab allows to enter FY2016 data for each measure and associated metrics.

RECOMMENDATIONS ARE TO: If you submitted FY2016 data, the original FY2016 submission will be displayed for reference on each of the following screens, but will not be included for analysis or review by HUD.

WARNING: If data are updated that creates selected total errors, the HUD will prevent the CoC from submitting the System Performance Measures report. The CoC will need to review and correct the original HMS data and generate a new HMS report for submission.

Any validation checks will result in warnings that require explanation, but will not prevent submission. Users should enter a note of explanation for each validation warning received. To enter a note of explanation, mouse the cursor over the tab, enter the text on the note bar. Enter a note of explanation and their before saving.

Measure 1: Length of Time Persons Remain Homeless
This measures the number of clients active in the report date range across ES, SH (Meta-1:1) and then ES, SH and TM (Meta-1:2) along with their average and median length of time homeless. This includes time homeless during the report date range as well as prior to the report start date, going back no further than October 1, 2012.

Mean 1.1: Change in the average and median length of time persons are homeless in ES and SH projects.
Mean 1.2: Change in the average and median length of time persons are homeless in ES, SH, and TM projects.

a. This measure is of the clients’ entry, exit, and bed night dates as entered in the HMS system.
